CONTENTS

Special Issue: Pore-forming Toxins and Antimicrobial Polypeptides

Cited in: Biological Abstracts, Cambridge Scientific Abstracts, Chemical Abstracts; Current Contents/Life Sciences Excerpta Medica (EMBASE); Environmental Mutagene Information Center; Environmental Periodicals Bibliography; Index Medicus

---

Editorial 1

The pore-forming peptide of *Entamoeba histolytica*, the protozoan parasite causing human amoebiasis
M. Leippe, H.J. Müller-Eberhard (Hamburg, Germany) 5

The cytolytic toxin aerolysin: from the soluble form to the transmembrane channel
F.G. van der Goot, F. Pattus, M. Parker, J.T. Buckley (Heidelberg, Germany; Fitzroy, Victoria and Victoria, Canada) 19

The channel formed in planar lipid bilayers by the protective antigen component of anthrax toxin
A. Finkelstein (Bronx, NY) 29

Clostridium perfringens enterotoxin acts by producing small molecule permeability alterations in plasma membranes
B.A. McClane (Pittsburgh, PA) 43

Pore-forming *Pseudomonas aeruginosa* cytotoxin
G. Xiong, M. Struckmeier, F. Lutz (Giessen, Germany) 69

All in the family: the toxic activity of pore-forming colicins
J.H. Lakey, F.G. van der Goot, F. Pattus (Heidelberg, Germany) 85

Pardaxin: channel formation by a shark repellant peptide from fish
Y. Shai (Rehovot, Israel) 109

Defensins: a family of antimicrobial and cytotoxic peptides
B.L. Kagan, T. Ganz, R.I. Lehrer (Los Angeles, CA) 131

Iturins, a special class of pore-forming lipopeptides: biological and physicochemical properties
R. Maget-Dana, F. Peypoux (Orléans, Villeurbanne, France) 151

Anion pores from magainins and related defensive peptides
H. Duclohier (Mont-Saint-Aignan, France) 175

Structure and membrane actions of a marine worm protein cytolysin, *Cerebratulus* toxin A-III
W.R. Kem (Gainesville, FL) 189

Mechanism of action of equinatoxin II, a cytolysin from the sea anemone *Actinia equina* L. belonging to the family of actinoporins
P. Maček, G. Belmonte, C. Pederzolli, G. Menestrina (Ljubljana, Slovenia and Trento, Italy) 205

The membrane attack complex of complement. Assembly, structure and cytotoxic activity
A.F. Esser (Kansas City, MO) 229

Pore-formation by *Escherichia coli* hemolysin (HlyA) and other members of the RTX toxins family
G. Menestrina, C. Moser, S. Pellet, R. Welch (Trento, Italy and Madison, WI) 249
